

## Requirements for Special Issue

A new requirement for the publication of Conference/Seminar/Congress proceedings (Special Issue) for Malaysian Journal of Chemistry has been set **commencing on February 2025**. They are as follows: -

1. The organization committee must appoint a person responsible for compiling the conference papers and provide their name and email address.
2. For the special issue, we require a guest chief editor, preferably a Professor from your institution who can work closely with the contact person. Please provide the guest editor's name and email address.
3. You can form a panel of reviewers, and each paper should be reviewed by at least two reviewers. The names of all reviewers should be sent to Dr Ngai Koh Sing at **nkohsing@yahoo.com**.
4. All papers must be related to chemistry, be of high quality, and have not been published elsewhere. Referees need to check this.
5. The papers should come from various institutions and not be from one institution only.
6. We allow a maximum of two papers from the same author and a maximum of 30 papers from the conference.
7. After the review process and necessary amendments have been made by the authors, the accepted papers should be proofread for language accuracy.
8. The final draft should follow MJChem format, especially for the references, and ensure that all diagrams or charts are clear.
9. After all accepted papers have been compiled, please submit them to Dr Ngai Koh Sing at **nkohsing@yahoo.com**.
10. Finally, IKM will issue an invoice of **RM4000 for the payment of 20 articles or less**. An **additional charge of RM1000 will be applied for 1-10 extra papers**.
11. The special issues for MJChem will be published in **February, June and October**.
