 1200 Check Out Hotel

The K3M technical committee members worked hard to ensure the completion of the question selection for the Ordinary level and Advanced level K3M. A brainstorming session was also held to discuss the future direction of K3M.

During our visit to Bangkok, we have the opportunity to experience the famous Thailand Water festival. also known as the Songkran Festival in Thailand, which falls on the 13th - 15th April 2018. On our way to the city center for some foods and shopping, many of our members got splashed with water and were totally drenched. But it is all in the good spirit to celebrate Songkran Festival.

This year the Kuiz Kimia Kebangsaan Malaysia (K3M) 2018 will be held on Thursday, 26th July 2018, in all participated schools.
