

Two special technical sessions added!

Call for Abstracts for Oral Presentations and Posters

Deadline – February 15, 2022

**MACRO 2022, the 49th World Polymer Congress
will be held from July 17-21, 2022 in Winnipeg, Canada**

Come join one of the world's largest gatherings of polymer scientists and engineers to share the latest advances. The abstract portal is now open to receive abstracts for oral presentations and posters for the following themes:

1. Polymer synthesis and kinetics
2. Polymer physics and characterization
3. Polymers for biomedical engineering
4. Polymers for nanotechnology
5. Smart and functional polymers
6. Polymers from renewal resources and biodegradable polymers
7. Polymer engineering and rheology
8. Polymers for energy and environmental applications

In addition, we welcome abstracts for the following two special technical sessions:

- **Porous Polymers**
- **The Fate of Polymers in a Changing World**

Please visit <https://www.macro2022.org/call-for-abstracts/> to submit abstracts.

If you want the option to revise your abstract up to the deadline date, please use the 'Save' button; once you hit the 'Submit' button, you will not be able to revise your abstract. To revise your abstract after its submission, contact the Program Manager at 2022macro-program@icsevents.com

We continue to base our planning on an in-person conference. However, in the event the addition of a virtual component to MACRO 2022 is justified, all accepted abstracts will be honoured.

We look forward to your contribution to make MACRO 2022 an engaging event.
