

## FASD - IKM Webinar Series

# Eco-Warriors Unleashed: Saving Mother Earth with CCS / CCUS

CCS/CCUS represents a pivotal strategy for addressing one of our planets's most pressing challenges: mitigating carbon emissions. With the power to capture and store carbon emissions from various sources, these technologies provide a ray of hope for a sustainable, low-carbon future. As part of webinar series held by FASD - IKM and co - organised by ACS-UTP Student Chapter, this webinar aims to create awareness on the importance of the continuous research and development (R&D) of experience on CCS/CCUS technology.

### Decarbonisation Strategies for Indonesia: Exploring Potential CCS Solutions

**Dr Belladonna Maulianda PhD, PEng**  
Executive Director,  
Indonesia CCS Center

### IKM & Chemistry as a Profession

**Datuk ChM Dr Soon Ting Kueh**  
President of Institut Kimia Malaysia

### Green Solvents for Decarbonisation

**Prof. Dr Cecilia Devi Wilfred**  
Professor at Fundamental and Applied  
Sciences Department, UTP

**Date: 21st February 2024**

**Time: 2.00 P.M.- 4.15 P.M.**

**Venue: Microsoft Teams**

**To join the webinar, scan the QRs for  
registration and Microsoft Teams link**

**To join, please click:**
